PERSONAL PROJECTS

4Ward- Social Mobile App

- Created a social networking Hybrid app with 18 screens, ensuring responsiveness. .
- Integrated Firebase authentication for secure login/logout and facilitated seamless post creation via Image Picker.
- Implemented intuitive tap gestures for effortless navigation in the reels section, enhancing user engagement.

BikeBuddy- Bike Rental Web Application

- This app is based on Reactjs with the integration in firebase in the backend.
- The app provides real-time updates on bike availability, ensuring users have the latest information on which bikes are currently ready for rental.
- Google Authentication is also provided for the user login after which users can buy or list their bikes on the website.

Google Clone

- Similar to the Google search engine, this web application enables users to do online information searches.
- It uses the Google Custom Search API as its engine, enabling it to provide results that are 100% identical to those offered by Google.

ACHIEVEMENTS

Bagged 77 percentile in JEE Mains.

AMCAT certified software engineer.

Udemy Certification in Data Structure and Algorithms & Web Development.

Selected for "The Regional Science Congress".

"Certificate-A" in National Cadet Corps (NCC).
